

MAILED 6/19

June 18, 1971

Dear Harold,

Thanks for your mailings of 6/12 and 6/15. Comments on the draft of two chapters of AO are enclosed.

Hope that your hearing on the 15th went well. John Nichols sent me his appeal brief, and I am enclosing my comments on it for you and Jim Lesar.

Gary will be in town next week. I'm looking forward to meeting him.

You asked if I had the Texas correspondence, as used by Sylvia and others. I have only a few pages, which I have sent you some time ago. However, the most extensive such file is in the Texas microfilm from the Library of Congress, which you had printed out. I believe you still have a complete set. (I have access to the film, so have no need for a copy, unless there are pages you find to be of special interest.)

You asked if I have any special Russian material to be translated. No, for the moment. I remind you that we have the Pravda stories on Davison; however, I also got (more recently) English summaries, so I don't think we need a full translation. Your translator may want to just read through the articles to see what there is on Davison.

Re comments in your 6/13 about my 4/23 Archives order:

I don't have anything else related to CD 358, the analysis of the State documents by Easterman. He wrote on the letterhead of "Subcommittee No. 1, General jurisdiction over assigned judiciary bills; special jurisdiction over immigration and nationality," and he is identified on the letterhead as "legislative assistant," presumably for just the subcommittee. Thus, there appears to be no connection with ~~SISS~~ the House version of SISS.

There is nothing of apparent significance in CD 427, which is barely legible. It is a largely narrative summary ~~of~~ examination of the Passport file right after 11/22, when it was realized right away that Oswald got his passport suspiciously fast, given the size of the file on him. I don't recall anything in it that was unfamiliar or inconsistent with what I already knew.

You mentioned that you had finished with this CD order. I remind you that you should take out the pages you want to keep, send me a list of them, and send the rest of the pages on to JNS.

Hastily,

*Paul*
